Editorial

The prime objective of the Galeri Warisan Kejuruteraan (GWK) is to publish scientific and technical research contributions in the fields of civil and environmental engineering. GWK provide a medium by means of which fruits of these researches may be brought to the attention of world's civil communities. In particular regard to the latter, the environmental preservation of natural media (soils and rocks) and the mitigation of soil pollutions, natural and technological risks are now not only major societal challenges, but they are also the source of scientific and technical developments that could be extremely beneficial. GWK focuses on all aspects of civil and environmental engineering and will accept the original research contributions (previously unpublished) from all areas of established engineering disciplines. The papers may be theoretical, experimental or both. Submissions are acceptable in both Bahasa Malaysia and English. We look forward to receive your scholarly work for publication in GWK.
